- A submersible pump \* 240 volt
- A digital flowmeter
- 4 metres of delivery hose and automatic shut off nozzle
- 10 micron filtration
- Key switch – to operate the pump
- Nozzle holster
- Bund / overfill alarm \*240 volt
- Overfill prevention valve

### OPTIONAL EXTRAS

- Fire Protection—The Tuffa FireStop is our patented Fire Protection for oil storage tanks and can be fitted to all of our Bunded range of tanks. It can be supplied in 30 / 60 minutes fire/thermal protection and 120 minute fire protection where required. It meets the methodology in BS5410: Part 1: Section 6.3 and the material is independently tested to BS476.
- Extra length delivery hose
- A light within the cabinet
- Higher accuracy contents gauge \*240 volt
- Hose reel – various lengths
- Higher output pump
- Armco protection barrier
- High security steel cabinet with roller shutter door
- Fuel management - The MC Box security system protects tanks from unauthorised use by only allowing approved users to access fuel through the use of pin numbers or keys. Many

users storing fuel (usually worth tens of thousands of pounds) don't always need expensive Fuel Management Systems but would like the security features such a system would offer at a lower cost. In its basic form the MC Box provides these security features with the option for simple upgrades to full Fuel Management for those who require it. Other options are available.
